

Report to Municipal Council

Meeting Date: February 19, 2025	Report Date: February 4, 2025
Reason Before Council: Policy Direction / Approval	Priority: Normal
Department: Environmental	Type of Meeting: Regular Meeting

Report Title: Update – Conservation and Demand Management Plan 2024

Recommended Resolution:

That Council approves and adopts the Conservation and Demand Management Plan 2024.

Analysis & Background:

The former Assistant to Department Heads had prepared the Conservation and Demand Management Plan and a draft was presented to Council at the August 14, 2024, Regular Meeting of Council. Unfortunately, with that position coming vacant, the Plan was never returned to Council for approval.

Based on Council comments in August 2024, the following changes have been made:

- The LED lighting in the arena was changed to reflect the year and no retrofit on the ice pad
- The addition of a thermostat for the Community Centre was added
- The remaining requests regarding COVID and the Public Works energy consumption without oil were already in the document

The document is now back before Council for final approval and adoption. Once adopted it will be posted on the website as required under Ontario Regulation 25/23.
